Full-Stack Developer | Vue 3 · PHP CodeIgniter · MySQL |
Manufacturing Systems
Kota Bekasi, Jawa Barat, Indonesia

Ringkasan

I'm a full-stack developer with a D3 in Informatics Engineering (GPA 3.95) and hands-on experience building production-grade web systems in a real industrial environment — an automotive manufacturing company in Bekasi, Indonesia. My day-to-day stack is Vue 3 + TypeScript on the frontend and PHP CodeIgniter 3 REST API with MySQL 5.7 on the backend. I design and build systems end-to-end: from database schema and stored procedures to responsive UI with Pinia state management. What I've built professionally → A Planning CMS that replaced a legacy stored-procedure pipeline with a GUI-driven interface for production scheduling → Inventory and achievement tracking modules used daily on the factory floor → A Flutter barcode/QR scanner app for welding WIP routing with role-based access and offline caching → A Node.js WhatsApp bot with multi-provider AI fallback, Supabase DB, and Midtrans payment integration. Outside my main role, I run EvrinoWEP Official for freelance and side projects — covering web apps, automation tools, and AI-assisted solutions. I communicate clearly, deliver on time, and write code that's maintainable — not just functional. If you need a developer who can take a brief from idea to shipped feature, I'm ready to help.

Pengalaman

PT. Mekar Armada Jaya Tambun
Program Specialist
November 2025 - Present (7 bulan)
Tambun Selatan

Magang Jogja
Programmer
September 2024 - Januari 2025 (5 bulan)
Banguntapan, Daerah Istimewa Yogyakarta, Indonesia

Mengerjakan real project ekspedisi dengan bermacam-macam role serta fitur, menggunakan framework Laravel versi 10.xx disertai dengan TailwindCSS, Vite, Flowbite, dan AlpineJS.

Pendidikan

Politeknik Negeri Semarang

Diploma of Education, Teknik Informatika · (Agustus 2022 - September 2025)

SMAN 1 Sragen

MIPA · (Juli 2018 - Juli 2021)
